

3-POINT WEIGHTS

Application:

The Hauer 3-point weights have a very compact design and are therefore particularly suitable for front loader works and still are universally usable.

Operating Principle:

The concrete filled steel casing ensures a very robust construction of the Hauer – 3-point weights. On request, the 3-point weights are available without concrete for self filling, e.g. for intermediate sizes.

Advantages:

- 6 different sizes fitting to respective tractor types
- compact and space saving construction
- robust steel casing avoids crumbling of concrete
- optimal attachment points for direct taking up and parking on the ground
- manoeuvring coupling for the use on public traffic areas
- as standard with reflector stripes

Type:

- hooks category 2/3 (depending on size)
- Standard Hauer orange or Hauer black matt (optional all RAL colours)
- optional stainless steel name badge (max. 10 letters)

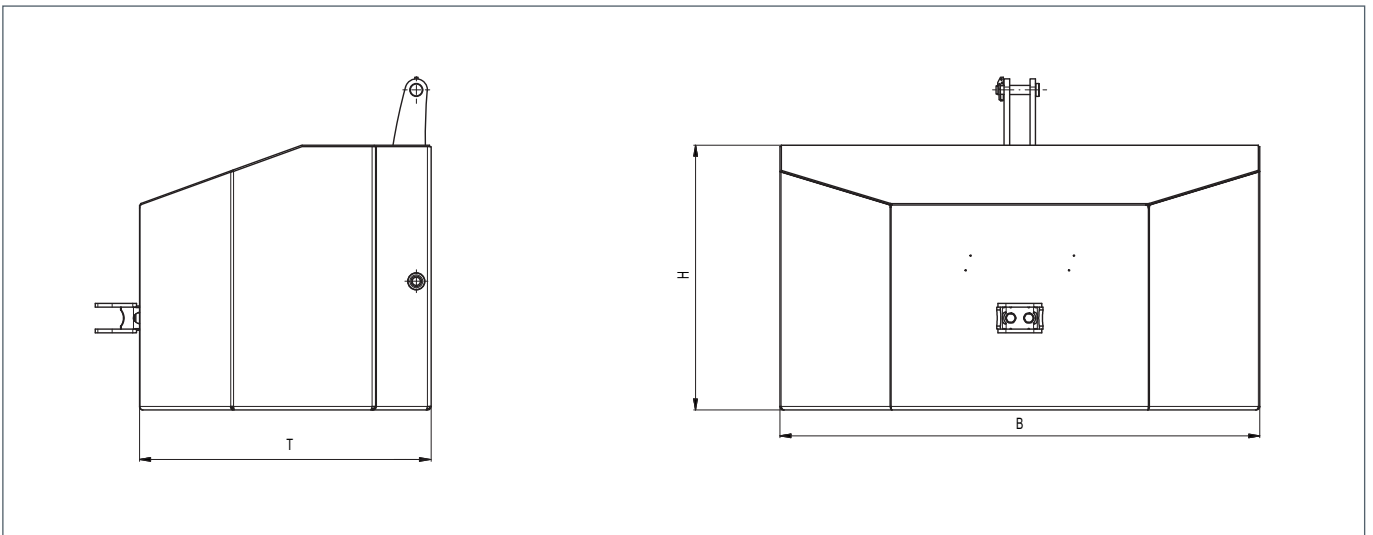

3-point weight 450 kg

3-point weight 2500 kg

Technical Data	Width mm (B) *	Depth mm (T) *	Height mm (H) *	Hooks Category	Weight kg
3-Point Weight 450 kg	795	432	700	2	70
3-Point Weight 700 kg	958	580	700	2	85
3-Point Weight 1000 kg	1088	785	700	2	103
3-Point Weight 1500 kg	1300	790	720	2	127
3-Point Weight 2000 kg	1620	790	720	2/3	206
3-Point Weight 2500 kg	1900	905	720	2/3	234
